Professional Summary

Motivated Information Systems graduate with a solid foundation in software development, data management, and IT support. I bring strong analytical thinking, problem-solving abilities, and hands-on experience from academic and personal projects, including mobile and web applications. I am eager to contribute to a forward-thinking organization by improving system efficiency, supporting digital transformation, and delivering reliable technical solutions. I adapt quickly, collaborate well in teams, and take initiative to learn new tools and technologies that support business goals.

Education

University of Johannesburg — BCom in Information Systems

2023 – 2025

Coursework includes Systems Analysis & Design, Database Management, Business Intelligence, and Software Development.

Patrick Ramaano Secondary School — National Senior Certificate (Matric) Completed: 2022

Experience

Final Year Academic Project – Information Systems Graduate

University of Johannesburg | 2025

- Applied systems analysis and business analysis techniques to translate user and business requirements into functional system solutions.
 - Contributed to the design, development, and testing of a technology solution within a structured academic environment.
 - Supported both front-end and back-end development tasks, ensuring data accuracy, system usability, and performance.
 - Worked with databases and data models to support reporting, decision-making, and system functionality.
 - Collaborated in a team setting, following project planning, documentation, and presentation standards aligned with real-world business environments.
-

Technical Skills

- Programming Languages: Python, SQL, C#, JavaScript
 - Web & Mobile Development: HTML, CSS, React JS, React Native, Android Studio
 - Databases: Microsoft Access, Microsoft SQL Server
 - Software & Tools: Visual Studio Code, Microsoft Office Suite (Word, Excel, PowerPoint), Node.js, Git/GitHub
 - Concepts: UI/UX Design, Troubleshooting, Data Analysis, Systems Integration
-

Soft Skills

- Excellent Communication & Team Collaboration
- Analytical and Critical Thinking

- Problem Solving & Decision Making
 - Adaptability & Time Management
 - Attention to Detail and Accuracy
 - Calm and Focused Under Pressure
 - Eager to learn
-

Academic & Personal Projects

FoodWise App — Smart Grocery Management Application

Developed a mobile app that helps users reduce food waste through AI-powered meal planning, inventory tracking, and price comparison.

- **Technologies:** Android Studio(Demo), React Native, Python, Firebase and SQL
- Managed both front-end and back-end functionalities.

Restaurant Reserve System — Online Restaurant Reservation Platform

Developed a full-stack restaurant reservation web application that enables users to find, view, and reserve tables at local restaurants. Implemented user authentication, dynamic search, and real-time booking features.

- **Technologies:** React.js, Node.js, and SQL.

Entrepreneur Island (Game Project)

Educational Entrepreneurship Board Game Designed and conceptualized a learning game for students aged 10–12, promoting creativity and business skills. Integrated concepts like risk-taking, innovation, and achievement motivation.

Interests

Software & Mobile App Development | Entrepreneurship | Gaming | Sports | Technology Innovation
